

Introduction to Beekeeping

Have you ever thought about keeping bees, wondered what equipment you will need or what is involved?

This 1 day course is designed to give you an introduction to keeping honeybees. Based at the club's out apiary at Lytham Hall, our experienced beekeepers will take you through the honeybee lifecycle, equipment you will need and other important information. In small groups you will be able to look inside a beehive (weather dependent) and also have the opportunity to ask questions about all aspects of beekeeping.

Heritage Trust *for the North West*
